

BADREDDINE IBRIL

Frontend Software Engineer

Casablanca, Morocco | badreddineibril@gmail.com | +212 630-195980 | bibril.com

PROFESSIONAL SUMMARY

Frontend Software Engineer with 3+ years of experience building large-scale e-commerce SaaS products serving 100,000+ merchants across MENA and West Africa. I work on design systems, storefront architecture, developer experience, and recently built AI-assisted editing tools into the storefront product. Outside of work, I maintain several open-source UI libraries and developer tools.

PROFESSIONAL EXPERIENCE

Frontend Software Engineer - YouCan.shop

Oct 2023 - Present

- Contributed to the architecture of storefront platform behind YouCan's e-commerce SaaS serving 100K+ merchants across MENA and West Africa
- Built and shipped 5 production storefront themes and 3 marketplace applications now used by merchants day to day
- Raised storefront performance, accessibility, and SEO scores across new themes, with measurable Core Web Vitals improvements
- Led the build-out of Celeste, our design system (inspired by AlignUI), and drove its adoption across the frontend team to cut down on inconsistent UI patterns
- Built internal tooling that made it easier for both our own engineers and third-party developers to build and ship themes and apps
- Designed and built an AI-assisted storefront editor that lets merchants generate and tweak storefront components instead of writing them by hand
- Collaborated with Product, Design, and Support to figure out what to build next and to fix what's actually breaking for merchants
- Review code and validate releases across frontend projects before they ship

PERSONAL PROJECTS & OPEN SOURCE

- Shadcn CSS:** A CSS-only take on shadcn/ui, for people who don't want a JS dependency
- AlwanKit:** Generates a full design color palette from a single starting color
- Material UI 3:** A component library implementing Google's Material Design 3 spec
- Chameleon UI:** Pure HTML and modern CSS components with zero dependencies
- Codate:** Create custom date formats in any language

TECHNICAL SKILLS

- Frontend:** React, Vue, TypeScript, JavaScript, HTML, CSS, Accessibility, Performance, Animations, Web Components
- Backend:** Laravel, Node.js, PHP, REST APIs, AI Integrations, Git, Docker, CI/CD
- Architecture:** Design Systems, Developer Experience, Component Libraries, E-commerce Platforms

EDUCATION

Bachelor of Computer Engineering

- Graduated: July, 2025
